

## BUREAU VERITAS CERTIFICATION HOLDING SAS CERTIFICATION STATEMENT

Bureau Veritas Certification has performed the 1<sup>st</sup> periodic verification of the Uganda Municipal Waste Compost Programme, CDM Registration Reference Number 2956, owned by International Bank for Reconstruction and Development as the Trustee of the community Development Carbon Fund (CDCF), which is located in Uganda, and applying the methodology AMS III.F Version 06, on the basis of UNFCCC criteria for the CDM, as well as criteria given to provide for consistent project operations, monitoring and reporting. UNFCCC criteria refer to Article 12 of the Kyoto Protocol, the CDM rules and modalities and the subsequent decisions by the CDM Executive Board, as well as the host country criteria.

The management of International Bank for Reconstruction and Development as the Trustee of the Community Development Carbon Fund (CDCF) is responsible for the preparation of the GHG emissions data and the reported GHG emission reductions of the Project on the basis set out within the monitoring plan contained in the registered PDD. The development and maintenance of records and reporting procedures in accordance with that plan, including the calculation and determination of GHG emission reductions from the Project, is the responsibility of the management of the Project.

Bureau Veritas Certification has verified the Monitoring Report version 04, dated 13 August 2014 for the reporting period as indicated below. Bureau Veritas Certification is able to confirm that the Project is implemented as described in the validated and registered project design document. Installed equipments being essential for generating emission reductions run reliably and are calibrated appropriately. The monitoring system is in place and the Project is generating GHG emission reductions as a CDM PoA project.

Bureau Veritas Certification is able to confirm that the GHG emission reductions are calculated without material misstatements. Our opinion relates to the Project's GHG emissions and resulting GHG emission reductions reported and related to the validated and registered project baseline, approved monitoring plan and its associated documents. Based on the verified amount of emission reductions stated in the verification report, Bureau Veritas Certification confirms the following statement:

Reporting period:	12/04/2010 to 30/04/2012
Baseline emissions:	28,747 t CO <sub>2</sub> equivalents
Project emissions:	12,198 t CO <sub>2</sub> equivalents
Leakage emissions:	0 tCO <sub>2</sub> equivalents.
Emission Reductions:	16,549 tCO <sub>2</sub> equivalents.
