SECTION 3: COMMENTS SUPPORTING REVIEW REQUEST

Please elaborate the reason for requesting a review on the issues you indicated in section 2 above

1) An excel sheet "Monitoring Results 160330_KE+Analysis.xlsx" has been submitted showing how the sampling was conducted. The following issues are identified:

- a) Cell C2 of sheet "Analysis" shows that a digester is considered non-operational when column N of sheet "160330_ke-carbon" is "no" to calculate parameter nk,y (Operational rate of the thermal application installed). The DOE is requested to substantiate how it has considered a digester as operational even when the household has declared that it was not working/using in the past month but with an assurance that the digester will be fixed in the next month, which is one month after the date of sampling and after this monitoring period (as indicated in column M,N, BO of sheet "160330_ke-carbon"). Please refer to VVS v9 paragraph 402(d);

- b) The DOE is requested to substantiate how it has verified that the result of the survey has met the requirement of the 90/10 confidence level. In doing so, the PP/DOE is requested to report the raw data and traceable calculation of the sampling precision. Please refer to Standard of Sampling and surveys for CDM project activities and programmes of activities Version 7, paragraph 17 and footnote 16. Please refer to VVS v9 paragraph 402(d), Standard of Sampling and surveys for CDM project activities and programmes of activities Version 7, paragraph 17 and footnote 16.
