SECTION A. Executive summary

The PoA aims at distribution of the low carbon emissions water purification technologies to households, communities and institutions in Rwanda, Nigeria, Kenya and Uganda. Thus, PoA through the dissemination of these technologies aims to address the issue of lack of access to safe drinking water.

In absence of the PoA, boiling water using fossil fuels/non-renewable woody biomass would have been the source of availing safe drinking water. The project Water Purification Systems (WPS) provides safe drinking water without the use of non-renewable biomass/ fossil fuel, thus leading to a reduction in Green-house gas (GHG) emissions.

This validation report for PRC covers implemented CPAs from 9948-P1-0043-CP1 to 9948-P1-0077-CP1 included in the registered PoA-DD.

Scope of validation

Earthood Services Private Limited is contracted by the CME to perform the validation of the post-registration changes proposed to the CPAs under verification. The scope of validation includes the assessment of the proposed PRCs primarily identified by CME as a temporary deviation from the monitoring plan as well as part of verification assessment. This validation is an independent and objective review of all the post-registration changes proposed in revised CPA DDs against criteria stipulated in latest valid versions of CDM VVS for PoA /4/, CDM PS for PoA /2/, CDM PCP for PoA /3/ and other related and relevant requirements, as appropriate.

Validation process

The validation process is undertaken by a qualified and competent validation team, involving a desk review of proposed post-registration changes as proposed in the Monitoring Report Version 3.0 dated 26/04/2021 /5/ provided by CME, interview or interactions with the representatives of CME, reporting and closure of findings, as appropriate and preparing a draft validation report complying with the relevant CDM requirements. The validation report prepared by the validation team is reviewed by an independent Technical Review team (one or more members). The final validation report that is accepted by Technical Reviewer is then approved on behalf of Earthood Services Private Limited and processed further as per CDM procedures.

Conclusion

The review of the revised MR, supporting documentation and subsequent follow-up actions (interviews) have provided ESPL with sufficient evidence to determine the fulfilment of stated criteria.

ESPL has performed the validation of the post registration changes of the CDM PoA "Impact Carbon Global Safe Water Programme of Activities (PoA)" having UNFCCC Ref. Number 9948. The post registration change was identified during the verification for the 4th monitoring period - **01/01/2020 – 21/03/2020** of the PoA.

The proposed post-registration change includes the following:

a) During this monitoring period, a temporary deviation from the registered monitoring plan occurred as CME was unable to monitor the monitored parameters as per the sampling plan.

The validation of post-registration changes concluded that the type of changes proposed in the revised monitoring Report Version 3.0 dated 26/04/2021/5/ can be submitted as notification of changes to a CPA to secretariat in-line to para 168 (b) of the PCP for PoA. The temporary deviation applies conservative method and thus, it is being submitted along with issuance request as per Appendix 2 of PS for PoA/2/. The validation team confirms that the proposed post-registration change complies with all the relevant CDM requirements of the applied methodology and all other applicable tools and guidance.

This report is the assessment opinion for temporary deviation and request is hereby submitted with issuance request to CDM EB.

The temporary deviation was identified at the time of verification assessment. Following para 231 of the PS for PoA Version 2 temporary deviation was proposed during the current monitoring period. Since the temporary deviation was identified during the verification of the fourth monitoring period (01/01/2020-21/03/2020) and the scope is not complete validation of the PoA and in accordance with para 184 of the VVS for PoA/4/ it is not mandatory for the DOE to conduct an on-site assessment. A thorough desk review conducted by the validation team was used as an alternative means to validate the temporary deviation.

SECTION D. Validation findings**D.1. Compliance with CPA-DD form**

Means of validation	This PRC proposes only a temporary deviation. Thus, as per para 169 of PCP for PoA /3/ the changes were required to be reflected only in the MR and does not require any revision in the CPA-DDs/7/.
Findings	No findings were raised
Conclusion	Not Applicable

D.2. Temporary deviations from the registered monitoring plan, applied methodologies, standardized baselines or other methodological regulatory documents

Means of validation	<p>As part of the verification of the fourth monitoring period covering a monitoring period from 01/01/2020 – 21/03/2020, wherein the monitoring report /5/ consists of CPAs 9948-P1-0043-CP1 to 9948-P1-0077-CP1, the verification team found temporary deviations from the registered monitoring plan.</p> <p>1. Temporary deviation for not following the monitoring plan in line with the registered monitoring plan/7/:</p> <p>CME had identified that there are systems in the database which were fully consumed/discontinued prior to the start of the current monitoring period. Since, CME could not provide a replacement for these systems to the institutions, thus CME decided to claim 0 ERs for these systems.</p> <p>The validation team checked the sales database/9/ in the ER calculation sheet provided by CME which distinctively under column 'AP' lists down the systems being considered for ER calculation for systems which has the residual capacity as evident from column 'AB' from previous MP and no subsequent supplies have been provided(column 'AC'). Such systems for which ERs have been considered as 'zero'.</p> <p>It was confirmed from the column 'AP' of the sales database sheet /9/, that systems which had zero residual capacity or has been discontinued prior to the start of the MP and had zero operational days left (as can be confirmed from the column 'AO' of the sales database sheet) have not been considered for ER calculation.</p> <p>Thus, CME in-line to para 228(a) of PS for PoA Version 2.0/2/, followed an alternative approach as CME had failed to follow the registered monitoring plan. Following the 228(a) of PS for PoA/2/, the CME has not considered/claimed any CERs for the systems which had zero residual capacity or has been discontinued prior to the start of the MP and had zero operational days left for the entire non-conforming monitoring period (i.e. 01/01/2020 to 21/03/2020) as checked from the ER sheet/9/.</p> <p>Thus, the alternative approaches were accepted by the validation team. The temporary deviation is sought for the entire period of MP i.e. from 01/01/2020-21/03/2020. The end-date of the temporary deviation i.e. 21/03/2020 is the same as the end date of the monitoring period.</p> <p>The CME would continue to monitor all the data required for calculation of emission reductions as per the registered monitoring plan for future verifications.</p> <p>Since the applied values were found to be the most conservative values and temporary deviation has been proposed for the current monitoring period for the CPAs, thus in-line with Appendix 2 of PS for PoA/2/, this request is being submitted with issuance track.</p>
Findings	No findings were raised.
Conclusion	<p>The DOE confirms that.</p> <ul style="list-style-type: none"> • The deviation applies for the monitoring period from 01/01/2020 to 21/03/2020 (as per para 251 of CDM VVS PoA Version 2 /4/). • There will be no over-estimation of emission reductions due to deviation as the assumptions and formulae are applied conservatively. • The deviation complies with the relevant requirements related to the temporary deviation from the registered monitoring plan as prescribed in the PS for PoA/2/ and VVS for PoA/4/.

SECTION E. Internal quality control

A draft validation report that is prepared by assessment team is reviewed by an independent technical review team (one or more members) to confirm if the internal procedures established and implemented by Earthood were duly complied with and such opinion/conclusion is reached in an objective manner that complies with the applicable CDM rules/requirements. The technical review team is collectively required to possess the technical expertise of all the technical area/sectoral scope the project activity relates to. All team members of the technical review team are independent of the assessment team.

During the technical review process, additional findings may be identified, or the closed-out findings may be opened, which needs to be satisfactorily resolved before the request for registration/issuance is submitted to UNFCCC. The independent technical reviewer may either approve the report as such or reject/return the same in such case providing the comments/findings/issues that need to be resolved by the assessment team. The decision taken by the Technical Reviewer is final and authorized on behalf of Earthood Services Private Limited.

SECTION F. Validation opinion

Earthood Services Private Limited (Earthood) has performed a validation of the post-registration changes of the 35 CPAs (9948-P1-0043-CP1 to 9948-P1-0077-CP1) project activity included under the PoA titled "Impact Carbon Global Safe Water Programme of Activities (PoA)". Earthood is accredited for the validation function for specific sectoral scopes (3: Energy demand) the CDM programme of activity falls into it.

The validation was performed on the basis of rules and requirements defined by UNFCCC for the CDM project activities. The review of the registered CPA-DDs/7/, applied methodologies/8/, supporting documentation and subsequent follow-up actions (including interviews), have provided Earthood with sufficient evidence to determine the fulfilment of stated criteria.

It is Earthood's opinion that the temporary deviation proposed in the monitoring report does not raise any concern with regards to the applicability of established baseline, additionality or scale of the project activity.

The changes are only applicable to the current monitoring period and do not have any impact on the registered CPA-DDs.

The changes are only in the Monitoring Report of the current monitoring period. Therefore, the PRC request is being submitted along with the issuance as per Appendix 2 of PS for PoA version 2.0/2/.
