This message has been forwarded.

Dear sir,

Please consider below comments.

project: Rural Household Biogas Digester Programme in Seven Regions of Sichuan Province

1) Inclusion criteria for CPA inclusion is not fully descriptive and adequate, must be enlarged and refined. The PoA to be webhosted for international stake holder consultations again after modifying the relevant sections. DOE should not undertake the validation of this kind of PoA's.

2) Number of CPA's to be included is not clear and more elaborate explanation necessary. Please correct the same and webhost the project again for comments. DOE to ensure that the project is republished or international stake holder consultation process.

3) DOE must confirm the correct and conservative identification of the Baseline. Baseline must be verifiable. Identification of baseline is not clear in all situations.

4) Multiple site visits must be made by DOE to cross check and establish proper baselines.

5) DOE to check for appropriate positioning of the PoA with regard to technological aspects.

Thanking you

Darshan

Subject Thank your comments for the sichuan rural household
programme

[Ref](#)

Dear Sir/Madam,

Thank you very much for your comments on the PoA "Rural Household Biogas Digester Programme in Seven Regions of Sichuan Province", some of them are very helpful to the programme and consistent with our validation plan, then we considered the comments in our validation work as below:

1. The inclusion criteria for CPA inclusion is enlarged and refined with more descriptive and adequate in the updated PoA-DD.
2. The programme will installed approximate 800,000 household biogas digesters in seven regions of the Sichuan province, such as: Deyang City, Guangyuan City, Nanchong City, Bazhong City, Yaan City, Liangshan Prefecture and Panzhihua City. The boundary of the programme is clear and it is unnecessary to identify the number of CPA's to be included as the Project is just a programme of activities. Instead, we validated the inclusion criteria strictly for the CPA inclusion in future.
3. A minor modification was done to the identified baseline according to the findings raised in the site-visit validation to achieve the correct and conservative.
4. We DoE conducted multiple site visits to cross check the proper baselines and found the baseline is reasonable and true.

Furthermore, there is still one question for your comments, what is the "appropriate positioning" mentioned in the comments exactly? Do you mean the contribution to sustainable development or something else? We are looking forward to your kindly response, thank you very much~

Best Regards.
