RE: LETTER OF APPROVAL – POA FOR THE REDUCTION OF EMISSION FROM NON-RENEWABLE FUEL FROM COOKING AT HOUSEHOLD LEVEL

We wish to refer to your request for host country approval for the above-referred Programme of Activities (POA). We note that the POA has the objective of reducing emissions from household cooking stoves through provision of water purification devices installed at household levels or by based water purification system where households will buy purified water at water stations. We further note that the POA will also provide efficient stoves that use renewable fuel.

As the Designated National Authority of Kenya for the Clean Development Mechanism, we wish to confirm that we have reviewed the Project Design Document of the above project. We further wish to confirm that:-

- The project is approved as a CDM project for the purposes of Article 12 of the Kyoto Protocol
- The Government of Kenya is Party to the Kyoto Protocol and that participation in CDM project activities is voluntary
- The project will contribute to Kenya's sustainable development
- Green Development AS is authorized to act as the coordinating/Managing Entity for the POA

We wish to note and confirm that this project, amongst other issues, will contribute to the overall realization of Kenya Vision 2030 through enhancing the use of clean renewable energy and clean alternatives to water purification. It is however to be noted that the project must comply with all the required national regulatory and/or planning requirements.

PROF. GEOFFREY WAHUNGU
DIRECTOR GENERAL
