**RE: LETTER OF APPROVAL; POA FOR REDUCTION OF EMISSIONS FROM NON
RENEWABLE FUEL FROM COOKING AT HOUSEHOLD LEVEL**

We wish to refer to your request for host country approval for the above-referred Program of Activity (POA). We note that the POA has the objective of reducing emissions from household cooking stoves through provision of water purification devices installed at household level or by based water purification systems where households will buy purified water at water stations. We further note that the PoA will also provide efficient stoves that use renewable fuel.

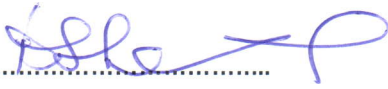

As the Designated National Authority of Sierra Leone for the Clean Development Mechanism, we wish to confirm that we have reviewed the Project Design Document of the above project. We further wish to confirm that:

- The project is approved as a CDM project for the purpose of Article 12 of the Kyoto Protocol.
- The Government of Sierra Leone is Party to the Kyoto Protocol and that participation in CDM project activity is voluntary.
- The project will contribute to the sustainable development of Sierra Leone
- Green Development AS is authorized to act as the Coordinating/Managing Entity for the PoA.

On behalf of Sierra Leone, I therefore issue this Letter of Approval (LoA) of voluntary participation in respect of the above proposed small scale CDM program. We do

however, wish it to be noted that project must comply with all the required national regulatory and/or planning requirements.

Yours sincerely

.....
Mr. Denis Sombi Lansana,
Designated National Authority of Sierra Leone.
