Shreyans Industries Ltd  
(Unit: Shreyans Papers)  
P.O. Ahmedgarh-148021  
Distt. Sangrur (Punjab)

**Sub: UASB Reactor**

Dear Sir,

This has reference to your letter dated 26<sup>th</sup> August, 2006 on the subject.

Based on the data available with us, there are a few installations of UASB in Indian pulp and Paper Industry. However, none of the installations is to treat waste water generated at Wheat straw wet washing.

The unit at Tamil Nadu Newsprint and Papers limited has similar application but it treats Bagasse yard and pulp mill washing area effluent. You may find the details from the Paper Published in Paperex 2003 page 219 to 233.

We appreciate the steps taken up by Shreyans Industries Ltd. to treat Wheat straw wash water and wish you a grand success. Also, we request you to send your technical communication and experience on the subject for the benefit of the other units in the Country.

Thanking you,

Yours faithfully

(N.K.Garg)  
Executive Secretary
