Lusaka,

ZAMBIA**AMENDED LETTER OF APPROVAL FOR THE PROGRAMME OF ACTIVITY (PoA - 6864) – FUEL EFFICIENT STOVES IN AFRICA**

On behalf of the officially Designated National Authority (DNA) for purposes of the Clean Development Mechanism (CDM) under article 12 of the Kyoto Protocol, I am directed to advise that your request to amend the Letter of Approval issued on 15th April 2011, has been approved to include the amendment of the PoA name from “**Fuel Efficient Stoves in Zambia**” to now read “**Fuel Efficient Stoves in Africa.**” The new PoA was considered by the DNA of the host country and confirms that:

1. The Government of Zambia ratified the Kyoto Protocol in July 2006;
2. This is approval of voluntary participation in the proposed CDM Programme of Activity (POA);
3. The project contributes to sustainable development in Zambia;
4. The DNA authorises 3 Rocks Limited to participate in the Programme of Activity (PoA).

The approval comes with a condition that the attached comments from the host country are addressed.

E.M Shitima

Director

Climate Change and Natural Resources Management Department

UNFCCC National Focal Point/Secretary to the DNA

For/Permanent Secretary

MINISTRY OF LANDS AND NATURAL RESOURCES

ADDITIONAL INFORMATION FROM THE DNA

In addition to the above, the DNA has also guided that during implementation of this PoA, you will be expected to address the following comments:

1. The PoA has not demonstrated how it will contribute to job creation and does not indicate a breakdown of such jobs by number, type and disaggregation by gender;
2. The PoA has not indicated whether the cook-stove would be manufactured locally or not therefore contributing to technology transfer;
3. What is the cost of the cook-stove with respect to its affordability;
4. How will the PoA interact with other existing PoA's distributing cook-stoves within the country, is there potential for double-counting of credits;
5. What is the project boundary for the cook-stove PoA in Zambia;
6. The PoA needs to provide the targeted level of emission reduction and also state the crediting period; and
7. If this cook stove is to be traditionally and locally acceptable it has to be a home grown solution which the PoA can improve on and have a home grown solution. There is need for a solid demonstration of local consultations around the technology.
8. Lastly the DNA requests for a model/design of the cook-stove.

**HOST COUNTRY APPROVAL FOR "FUEL EFFICIENT STOVES IN ZAMBIA"
PROGRAMME OF ACTIVITY (POA)**

On behalf of the officially Designated National Authority (DNA) for purposes of the Clean Development Mechanism (CDM) under article 12 of the Kyoto Protocol, I am directed to state that the Project Design Document (PDD) for the proposed Programme of Activity (PoA) "***Fuel Efficient Stoves in Zambia***" and the first Component of the Programme of Activity (CPA-1) were considered by the National CDM Board of the DNA meeting held on 11th February 2011 and subsequently through electronic clarification of a number of points raised at the meeting. The DNA confirms that:

1. The Government of Zambia ratified the Kyoto Protocol in July 2006;
2. This is approval of voluntary participation in the proposed CDM project activity;
3. The project contributes to sustainable development in Zambia;
4. The DNA authorizes the 3 Rocks Limited to participate in the project.

The DNA further advises that it be kept informed of any subsequent CPAs to be added to the Programme of Activity.
