

 <p style="text-align: center;">CDM: Revision Form for Approved Methodologies (version 01) (To be used for responding to requests for clarifications on approved methodologies)</p>	
Date of Meth Panel meeting:	06 – 09 June 2006
Title/Subject (give a small title or specify the subject of your submission, maximum 200 characters):	Applicability of ACM0009 to projects in the district heating sector
Indicative methodology to which your submission relates	ACM0009, AM0008 (withdrawn with effect from 19 May 2006 and incorporated into ACM0009)
Name of the authors of the query:	DNV-CUK
<p>Summary of the query:</p> <p>Please use the space below to summarize the request for clarification on the related approved methodologies.</p> <p>>> AM0008 is currently limited to industrial facilities. In March 2006, DNV-CUK requested whether AM0008 is also applicable to a project in the <u>energy sector</u> (sectoral scope 1), <u>such as to a project in the district heating sector</u>. The Meth Panel provided a clarification at its 20th meeting that AM0008 is indeed linked to sectoral scope 4 (Manufacturing industries) and thus not applicable to the <u>energy sector</u>, with the main rationale being that a fuel switch in power plants in the energy sector may result in changes in the quantity of electricity produced in the project – an issue that methodologically has not been taken into account in AM0008. This was confirmed at EB24.</p> <p>This request seeks clarification whether ACM0009 is applicable to <u>district heating projects</u>. EB24 has withdrawn AM0008, therefore this request relates now to ACM0009.</p>	
<p>Recommendation by the Meth Panel:</p> <p>Please use the space below to provide amendments /changes (in your expert view, if necessary).</p> <p>>> The Meth Panel recommends, following the request, to revise the approved consolidated methodology expanding its applicability to projects in other sectors, including fuel switches in heat-only boilers in the district heating sector. A revised draft of ACM0009, recommended for approval by the Board, is provided in the report of the twenty first Meth Panel meeting.</p>	
<p>Answer to authors of the request for clarification by the Meth Panel :</p> <p>Please use the space below to provide an answer to the authors of the above query</p> <p>>> The Meth Panel clarified that the present version of ACM0009 is not applicable to the type of projects mentioned in the request for clarification. The Meth Panel has recommended a revision of ACM0009 to expand its applicability to projects in other sectors, including fuel switches in heat-only boilers in the district heating sector. If approved by the Board, the latest version of the approved methodology shall be applicable to such project types.</p>	

Signature of the Meth Panel Chair
 Date: 21/06/2006 (Rayesh Sethi)

Signature of the Meth Panel Vice-Chair
 Date: 21/06/2006 (Jean-Jacques Becker)

Information to be completed by the secretariat	
F-CDM-AM	F-CDM-AM-Rev-0030/27
Date when the form was received at UNFCCC secretariat	21 June 2006
Date of transmission to the EB	21 June 2006
Date of posting in the UNFCCC CDM web site	21 June 2006
