SECTION A. Description of bundle and subbundles**A.1. General description of project activities in bundle**

>>

The project activity is the installation of 5 Wind Turbine Generators (WTGs) of different make and capacity at Maharashtra and Gujarat state of India. The project activity uses renewable energy (wind) as a clean fuel to generate electrical energy. The total installed capacity of the project is 8.8 MW, which comprises 5 nos. of Wind Machines installed. The details are as follows;

Project activity		Type (I, II or III)	Methodology (ies)	Technology(ies) / Measure(s)
Project Investor	Capacity in MW			
Surbhi Textile Mills Pvt. Ltd.	2	I Renewable Energy Projects.	AMS- I.D.(Version 17, EB 61)	Wind Energy
Surbhi Textile Mills Pvt. Ltd.	2			
Surbhi Textile Mills Pvt. Ltd.	0.8			
SJP Constructions Private Limited	2			
SJP Constructions Private Limited	2			

The wind power project is emission free source of energy and will reduce the overall emissions of the respective grids of India. The project activity generates 16,490 MW of electricity annually which displaces approximately 112,546 tCO₂e over the crediting period leading to an estimated value of 16078 tCO₂e per annum. The project activity involves Wind Machines of different make, capacity and manufacturer.

The project activity is a bundled project activity and ReXchange Global Solutions (P73) will act as a focal point and the CER sharing among the participants will be done through internal agreements between the partners.

The project activity qualifies as Type I of the small scale methodologies during every year of the crediting period in accordance with applicable provisions for project activity eligibility. Also the total installed capacity of project activity is 8.8 MW which is less than 15 MW threshold limit for small scale project activities. The project capacity will be always remain the same and hence the project activity will always be under the threshold limit of small scale project activities in each year of the crediting period.
