

CDM: Recommendation Form for Small Scale Methodologies (version 01)

(To be used for presenting questions/proposals/amendments to the simplified methodologies for small-scale CDM project activity categories)

<i>Date of SSC WG meeting:</i>	As per procedures for fast track clarifications
<i>Title/Subject (give a small title or specify the subject of your submission, maximum 200 characters):</i>	Consideration of leakage emissions in non-PoA small scale bundling project activity applying AMS-III.B
<i>Indicative methodology to which your submission relates (refer the items of Appendix B of the Simplified Modalities and Procedures), if applicable.</i>	AMS-III.B
<i>Name of the authors of the query:</i>	Sunil Kumar Sharma Institution: Verve Carbon suniliitian@yahoo.com

Summary of the query:

Please use the space below to summarize the query related to SSC methodologies/categories SSC Modalities and Procedures provide recommendation/analysis of the SSC WG.

Original text from PP:

We are developing a small scale CDM bundling project for fuel switch from fossil fuel to Natural Gas considering coal as baseline. We are using AMS III B version 13 methodology. As per the methodology, leakage calculation is not required.

However for PoA, leakage emissions resulting from fuel extraction, processing, liquefaction, transportation, re-gasification and distribution of fossil fuels outside of the project boundary shall be considered, as per the guidance provided in the leakage section of ACM0009.

Our project activity is a small scale project activity and not a project activity under a programme of activities. Kindly suggest if we need to consider leakage emission resulting from fuel extraction, processing, liquefaction, transportation, re-gasification and distribution of fossil fuels outside the project boundary for our CER calculation as per ACM0009.

Recommendation by the SSC WG:

Please use the space below to provide amendments/change (in your expert view, if necessary).

This recommendation is as per the procedures for fast track clarifications as specified in paragraph 8 of the 'procedures for the submission and consideration of request for clarification of approved small-scale methodologies' found at http://cdm.unfccc.int/Reference/Procedures/MethSSC_proc01_EB34a06.pdf.

Answer to authors of query by the SSC WG:

Please use the space below to provide answer to the authors of the above query

The small-scale working group of the CDM Executive Board would like to thank the author for the submission.

The SSC WG agreed to clarify that version 13 of AMS-III.B does not require the consideration of leakage

emission resulting from fuel extraction, processing, liquefaction, transportation, re-gasification and distribution of fossil fuels outside the project boundary when being applied to a bundled project activity. Such leakages are to be considered only in the context of a project activity under a programme of activities in accordance with version 13 of AMS-III.B.
