#### **4. Carbon Credit Development Project**

Carbon Credit Development implies in the documentation of the parameters to be submitted to certification. This document aims to present the amount of credits being claimed and, especially, to substantiate and ensure the validity of this claim. Once again, the key stage is to demonstrate the project's additionality, that is, to give evidence that the project is financially unfeasible without the certification of the credits.

The following is a description of the main topics to be documented.
