

**Approved baseline and monitoring methodology /
methodological tool clarification response form
(Version 03.0)**

INFORMATION TO BE COMPLETED BY THE SECRETARIAT OR PANEL / WG

Date and number of Panel / WG meeting:	N/A
Title/Subject of the request for clarification:	Clarification on regional emission factor
Reference number of the request for clarification:	SSC_768
Exact reference (number, title and version) of the methodology or methodological tool to which the request for clarification applies:	AMS-III.AV. Low greenhouse gas emitting safe drinking water production systems --- Version 7.0
Fast track or Regular track:	<input checked="" type="checkbox"/> Fast track <input type="checkbox"/> Regular track

Summary of the request for clarification

Original text from Stakeholder:

Dear Meth Panel,

Please provide your opinion on the following issue related to emission factor:

AMS-I.E and AMS-III.AV are similar in some aspects:

- A. resulting in the reduced use of nonrenewable biomass in households;
- B. promoting distributed technologies;
- C. supporting basic service providing technologies

AMS-I.E ver 10.0 table 2 suggests regional Emission Factors for substitution of non-renewable biomass. Considering the similarities between the meths and historically AMS-III.AV has cross referenced the emission factor from AMS-I.E, would it be appropriate to consider same regional Emission Factors for the AMS-III.AV projects as well ?

Clarification by the secretariat or Panel / WG

The secretariat would like to thank the stakeholder for the query.

In principle, the default values listed in Table 2 in AMS-I.E. should be eligible to use under AMS-III.AV. v07 if all the related conditions are satisfied.

The stakeholder should submit a request for revision to AMS-III.AV. to include above referred default values.

Version(s) of the approved methodology / methodological tool to which the clarification is applicable:

AMS-III.AV.: Low greenhouse gas emitting safe drinking water production systems --- Version 7.0
