

 <p style="text-align: center;">CDM: Revision Form for Approved Methodologies (version 01) (To be used for responding to requests for revision on approved methodologies)</p>	
Date of Meth Panel meeting:	06 - 09 June 2006
Title/Subject (give a small title or specify the subject of your submission, maximum 200 characters):	“Modification of the applicability condition of the methodology to allow the cogeneration system to be owned or operated by the consuming facility that receives the project heat and electricity”
Indicative methodology to which your submission relates	AM0014: “Natural gas-based package cogeneration”
Name of the authors of the query:	Det Norske Veritas Ltd
Summary of the query: Please use the space below to summarize the request for revision on the related approved methodologies.	
>> The Meth Panel is requested to expand the applicability of the approved methodology AM0014 to project activities where cogeneration system is owned or operated by the facility consuming the project heat and electricity.	
Recommendation by the Meth Panel: Please use the space below to provide amendments /changes (in your expert view, if necessary).	
>> The Meth Panel agreed, based on the documentation provided with the request for modification by the DOE, that the applicability of the approved methodology AM0014 can be expanded to project activities where the cogeneration system is owned or operated by the facility consuming the project heat and electricity (henceforth referred as self-owned cogeneration). Besides some minor changes in the baseline methodology text to expand the applicability criteria, a fourth additionality test is included in the methodology, “2D Institutional barriers for Industrial Users”, to be used if the cogeneration plant is self-owned (see modified methodology). With this modification, all four additionality tests must be used for evaluating additionality of self owned cogeneration plants, whereas, only the first three tests must be passed in the case of third party ownership. The Meth Panel recommended revising the methodology as included in the annex of the twenty-first meeting report of the Meth Panel.	
Answer to authors of the request for revision by the Meth Panel : Please use the space below to provide an answer to the authors of the above query	
>> The Meth Panel agreed, based on the documentation provided with the request for modification by the DOE, that the applicability of the approved methodology AM0014 can be expanded to project activities where the cogeneration system is owned or operated by the facility consuming the project heat and electricity (henceforth referred as self-owned cogeneration).	

Signature of the Meth Panel Chair
 Date: 21/06/2006 (Rajesh Kumar Sethi)

Signature of the Meth Panel Vice-Chair
 Date: 21/06/2006 (Jean-Jacques Becker)

Information to be completed by the secretariat

F-CDM-AM	F-CDM-AM-REV-0010
Date when the form was received at UNFCCC secretariat	21 June 2006
Date of transmission to the EB	21 June 2006
Date of posting in the UNFCCC CDM web site	21 June 2006
