|   | <b>CDM: Response form for Request for revision of approved methodologies<br/>(version 01.1)</b>   |
| <i>Date of Meth Panel meeting:</i>   | 24 – 28 September 2007  |
| <i>Title and number of Request for revision</i>  | The proposed revised methodology will expand ACM0003/ ver. 04 scope to include projects that source biomass from dedicated plantations as an alternative fuel / AM_REV_0055 |
| <b>Summary of the query:</b><br>Please use the space below to summarize the request for revision on the related approved methodologies.  |   |
| The request suggests broadening the applicability of ACM0003 to project activities that cultivate biomass on dedicated land areas that were previously used and where, thus, the cultivation of biomass for the project activity may result in a shift of the previous uses to other land areas (shift of pre-project activities).   |   |
| <b>Recommendation by the Meth Panel:</b>   |   |
| (a) Please use the space below to provide amendments /changes (in your expert view, if necessary).   |   |
| The Meth Panel recommends approving the request with some changes. The request for revision suggests addressing the issue of shifts of pre-project activities by a number of applicability conditions, including that workers that have previously used the land continue to be employed, that no fuel wood is gathered from the plantation and that the renewable biomass is planted in a country where no natural forest exists. |   |
| (b) Please use the space below for providing guidance, as per Para 93 of EB25 Report, on what type of projects need to revise the PDD as a consequence of the suggested revision, if the recommendation is to revise the methodology.  |   |
| The revision to ACM0003 broadens the applicability of ACM0003 – most projects will not be affected by this revision. Projects that establish a new dedicated plantation to supply cement plants will be affected by the revision, as some applicability conditions have been added, based on the request for revision, to avoid leakage. These amendments had been omitted in the previous versions of the methodology.            |   |
| <b>Answer to authors of the request for revision by the Meth Panel :</b>   |   |
| Please use the space below to provide an answer to the authors of the above query  |   |
| The Meth Panel recommends approving the request for revision with some changes.  |   |

Signature of Meth Panel Chair .....

Date: 28/09/2007

(Akihiro Kuroki)

Signature of Meth Panel Vice-Chair .....
