

	<p align="center">CDM: Recommendation Form for Small Scale Methodologies (version 01) <i>(To be used for presenting questions/proposals/amendments to the simplified methodologies for small-scale CDM project activity categories)</i></p>
Date of SSC WG meeting:	SSC WG 13, 07- 09 November 2007
Title/Subject (give a small title or specify the subject of your submission, maximum 200 characters):	Revision of AMS III.H. to allow for bottling of biogas
Indicative methodology to which your submission relates (refer the items of Appendix B of the Simplified Modalities and Procedures), if applicable.	AMS III.H
Name of the authors of the query:	Marius Kaiser Institution: EcoSecurities Marius@ecosecurities.com
Summary of the query:	
Please use the space below to summarize the query related to SSC methodologies/categories SSC Modalities and Procedures provide recommendation/analysis of the SSC WG.	
<p>A revision of AMS III.H “Methane recovery in wastewater treatment” is proposed to allow for the bottling of recovered methane. Currently the methodology only allows for flaring and use for heat and/or electricity generation of the recovered methane.</p> <p>The recovered biogas will be first upgraded i.e., removal of sulphide and carbon dioxide, before it is bottled such that bottled gas has 96% methane content. Bottled biogas will be sold to industrial end-users at a market price. No emission reductions will be claimed for the displacement of fossil fuels by the use of bottled biogas.</p>	
Recommendation by the SSC WG :	
Please use the space below to provide amendments/change (in your expert view, if necessary).	
Please refer to Paragraph 7 of the meeting report of the SSC WG 13 (http://cdm.unfccc.int/Panels/ssc_wg).	
Answer to authors of query by the SSC WG :	
Please use the space below to provide answer to the authors of the above query	
<p>The small scale-working group of the CDM Executive Board would like to thank the author for the submission.</p> <p>The SSC WG noted that the submission has adequately addressed the issues raised by SSC WG12. The working group agreed to recommend a revision to approved methodology AMS III.H to expand the applicability of the methodology to allow for the bottling of recovered methane as contained in annex 3 of SSC WG13 report.</p>
