

 <p style="text-align: center;"><b>CDM: Revision Form for Approved Methodologies (version 01)</b> (To be used for responding to requests for clarifications on approved methodologies)</p>	
Date of Meth Panel meeting:	31 January - 03 February 2006
Title/Subject (give a small title or specify the subject of your submission, maximum 200 characters):	Applicability of AM0014 to cogeneration systems own or operated by the consuming facility that receives the project heat and electricity
Indicative methodology to which your submission relates	AM0014 - Natural gas-based package cogeneration
Name of the authors of the query:	Det Norske Veritas Ltd
<b>Summary of the query:</b> Please use the space below to summarize the request for clarification on the related approved methodologies.	
>> The Meth Panel is requested to modify applicability conditions of AM0014 to allow the cogeneration system to be owned or operated by the consuming facility that receives the project heat and electricity.	
<b>Recommendation by the Meth Panel:</b> Please use the space below to provide amendments /changes (in your expert view, if necessary).	
>> The Meth Panel agreed that, based on the documentation provided with the request for clarification by the DOE, that the applicability conditions of AM0014 should not be expanded to also apply to cogeneration systems to be owned or operated by the consuming facility that receives the project heat and electricity, as this would imply a modification of the additionality test originally proposed in the methodology, making it less rigorous than the one initially thought.	
<b>Answer to authors of the request for clarification by the Meth Panel :</b> Please use the space below to provide an answer to the authors of the above query	
>> The Meth Panel agreed that the request for clarification by the DOE, that the applicability conditions of AM0014 should not be expanded to also apply to cogeneration systems to be owned or operated by the consuming facility that receives the project heat and electricity, should be rejected, as this would imply a modification of the additionality test originally proposed in the methodology making it less rigorous than the one initially thought.
