

**CDM: Response form for request for clarification on  
Approved Methodologies  
(version 01.1)**

<i>Date of Meth Panel meeting:</i>	11 - 15 June 2012
<i>Title and number of request for clarification</i>	Applicable conditions for 'Tool to calculate project or leakage CO <sub>2</sub> emissions from fossil fuel combustion (EB41, annex11, ver02)  CLA_TOOL_0016
<b><u>Summary of the query:</u></b>  Please use the space below to summarize the request for clarification on the related approved methodologies.	
<p>The 'Tool to calculate project or leakage CO<sub>2</sub> emissions from fossil fuel combustion (ver02)' provides procedures to calculate project and/or leakage CO<sub>2</sub> emissions from the combustion of fossil fuels and requires the continuous onsite measurements of quantity of fuel type i combusted in process j during the year y.'</p> <p>The project activity uses a small quantity of steam from two coal fired boilers; which are supplying to other processes as well. The total quantity of coal used in the boilers is monitored and the steam used for the project activity and other processes are also monitored.</p> <p>Clarification is sought on whether the above mentioned situation is applicable under this tool or not.</p>	
<b><u>Recommendation by the Meth Panel:</u></b>  Please use the space below to provide amendments /changes (in your expert view, if necessary).	
Not applicable.	
<b><u>Answer to authors of the request for clarification by the Meth Panel :</u></b>  Please use the space below to provide an answer to the authors of the above query	
<p>The Meth Panel would like to clarify that the current version of the tool is not applicable to such type of project activity. The tool states in the scope and applicability section that "It can be used in cases where CO<sub>2</sub> emissions from fossil fuel combustion are calculated based on the quantity of fuel combusted and its properties." It is understood then that the amount of fossil fuel used for the project activity process j is known.</p> <p>The case presented in this request for clarification would need further procedures for apportioning emissions to be added in the approved methodology applicable to the project activity or in the tool mentioned above. Project proponents are encouraged to submit a request for revision to the methodology or the tool related to the above mentioned project activity.</p>	

Signed by the Chair, Mr. Thomas Bernheim
