

	CDM: Response form for Request for revision of approved methodologies (version 01.1)
<i>Date of Meth Panel meeting:</i>	3 - 7 October 2011
<i>Title and number of Request for revision</i>	Inclusion of prior processing with mobile facilities and transport CNG to gas pipeline in AM0009 AM_REV_0218
<u>Summary of the query:</u> Please use the space below to summarize the request for revision on the related approved methodologies.	
<p>AM0009 “Recovery and utilization of gas from oil wells that would otherwise be flared or vented” is applicable to project activities that recover and utilise associated gas and/or gas-lift gas from oil wells. The associated gas and/or gas-lift gas was flared or vented prior to the implementation of the project activity.</p> <p>The request for revision aims at expanding the applicability of the methodology by:</p> <ul style="list-style-type: none"> • Allowing both movable and stationary equipment for gas processing; • Allowing processing on site (within the project boundary) by adding an alternative schematic illustration of the project boundary, and to expand the project boundary to include on-site processing and transportation; • Allowing transportation of hydrocarbon products by trailers; • Adjusting the definitions of baseline emissions and project emissions in order to be compatible with the revision; and • Allowing other comparable legally binding contract and/or independent third-party studies to be used as a source for the ex-ante estimation of emission reductions, in addition to the production sharing contract (PSC). The project participants argue that this is reasonable because ‘survey used for defining the terms of the underlying oil production project as per the production sharing contract’ is not always available in some host countries such as China, while comparable legally binding contract and/or independent third-party studies can also guarantee the ex-ante estimation of emission reductions is based on reliable information source. 	
<u>Recommendation by the Meth Panel:</u> (a) Please use the space below to provide amendments /changes (in your expert view, if necessary).	
Please, refer to the box below.	
(b) Please use the space below for providing guidance, as per Para 93 of EB25 Report, on what type of projects need to revise the PDD as a consequence of the suggested revision, if the recommendation is to revise the methodology.	
Please, refer to the box below.	

Answer to authors of the request for revision by the Meth Panel :

Please use the space below to provide an answer to the authors of the above query

The Meth Panel recommends to approve the request for revision with modifications. The draft revised methodology is annexed to the fifty-second Meth Panel meeting report.

Signed by the Chair, Mr. Philip Gwage

Date: 7/10/2011

Signed by the Vice-Chair, Mr. Lex de Jonge

Date: 7/10/2011

Information to be completed by the secretariat

F-CDM-AM	AM_REV_0218
Name of the authors of the query:	ERM CVS
Date when the form was received at UNFCCC secretariat	7 October 2011
Date of transmission to the EB	7 October 2011
Date of posting in the UNFCCC CDM web site	7 October 2011
