

CDM: Recommendation Form for Small Scale Methodologies (version 01)
(To be used for presenting questions/proposals/amendments to the simplified methodologies for small-scale CDM project activity categories)

<i>Date of SSC WG meeting:</i>	15–18 June 2010, SSC WG 26
<i>Title/Subject (give a small title or specify the subject of your submission, maximum 200 characters):</i>	Clarification on the applicability of AMS-III.T to plant oil production and use for electricity generation
<i>Indicative methodology to which your submission relates (refer the items of Appendix B of the Simplified Modalities and Procedures), if applicable.</i>	AMS-III.T “Plant oil production and use for transport applications”
<i>Name of the authors of the query:</i>	Ngaah Moses Institution: CO2focus AS moses@co2focus.com

Summary of the query:

Please use the space below to summarize the query related to SSC methodologies/categories SSC Modalities and Procedures provide recommendation/analysis of the SSC WG.

Original text from PP:

We are involved in the development of a CDM project based on the production of plant oil from jatropha seeds, and using the sieved oil to run diesel generators for the production of electricity.

Only methodology ASM – III.T Plant oil production and use for transport applications, comes close to covering our activities/technology, but for the fact that it specifically talks about the use of the plant oil for transportation. So, we will like to know if we could also use this methodology for static plants; like the diesel generators.

Recommendation by the SSC WG:

Please use the space below to provide amendments/change (in your expert view, if necessary).

Please refer to paragraph 27 of the meeting report of the SSC WG 26
http://cdm.unfccc.int/Panels/ssc_wg.

Answer to authors of query by the SSC WG:

Please use the space below to provide answer to the authors of the above query.

The small-scale working group of the CDM Executive Board would like to thank the author for the submission.

The SSC WG agreed to clarify that the project activities involving plant oil production and use for stationary applications (e.g. thermal or electrical energy generation) is not applicable in accordance to paragraph 1 of AMS-III.T. The author of the submission may wish to note that the SSC WG agreed to recommend a new Type I methodology for plant oil production and use in stationary applications for approval of the Board (See annexes 4 and 5 of the SSCWG 26 meeting report).

Signed by the Chair, Mr. Peer Stiansen

Date: 18/06/2010

Signed by the Vice-Chair, Mr. Hugh Sealy

Date: 18/06/2010

Information to be completed by the secretariat

SSC-Submission number	SSC_429
Date when the form was received at UNFCCC secretariat	18 June 2010
Date of transmission to the EB	18 June 2010
Date of posting in the UNFCCC CDM web site	18 June 2010
