If necessary, attach files or refer to sources of relevant information.</p> <p>If you have a question relating to the application of the approved A/R methodologies, please specify and provide reference to the exact project activity to which it applies.</p>	

>> At its 27th meeting, the A/R WG clarified that PDDs using the methodologies listed above can be uploaded for public comments at any date before 30 April 2011 (AR/WG report, para. 15).

We kindly ask you to clarify whether for the methodologies listed above, PDDs can be registered applying the versions of the methodologies listed above, when the Global Stakeholder Process (GSP) was started with a *later* version of the methodology.

The requested clarification affects PPs developing A/R CDM projects where:

- the PDD was prepared using a version of the A/R CDM methodologies listed above; but where
- the GSP was started with a revised version of the methodology, as between EB 50 as the date of approval of the revised versions of the methodologies listed above and EB 53 as the acceptance of the respective clarification of A/R WG by EB, *it was technically not possible to upload PDDs to the UNFCCC website to start the GSP applying the versions listed above.*

This question affects PPs and the DOE as the GSP would need to be repeated in case the reply to the clarification request is negative.

Hence the question is if the first GSP is sufficient in case of downgrading of a version of a methodology, while assuring that there is no design change of the project.

If you propose an amendment to the approved A/R methodologies, please provide justification.
