## 关于对四川省江油市龙凤水电站项目建设的 评价意见

四川省江油市龙凤水电站项目是我市“十一五”规划实施的一个重大投资项目，该电站是由一个拦河坝和输入水渠道组成的混合式开发水电项目，总投资 41395 万元，总装机 5.4 万 KW，多年平均发电量为 2.85 亿 KW，坝址位于涪江河剥牛滩，发电厂房位于龙凤镇许家松林，建设工期为 27 个月。根据四川省环保局《关于对江油市龙凤水电站工程环境影响报告书的批复》（川环建函〔2006〕102 号）意见，该电站建设规划符合环境保护要求，符合国家发展水电的产业政策。我市认为，该电站建设实施有利于促进地方经济发展，符合国家相关产业政策，完全支持江油市龙凤水电站申报 CDM 项目。

## **Government Opinions on Sichuan Jiangyou Longfeng Hydropower Station**

Sichuan Jiangyou Longfeng Hydropower Station a combined hydropower station which consists of a dam and a water input canal. The total investment is 413.95 million Yuan, the total installed capacity is 54MW, and the average annual power generation is 0.285 billion KW. The dam is located on the Boniutan of Fujiang River; the power plant is located in Xujia Village, Longfeng Town. The construction period will be 27 months. According to Approval on the Environmental Impact Assessment of Jiangyou Longfeng Hydropower Station (ChuanHuanJianHan[2006]No.102), the construction of this project complies with the environmental protection regulations, and complies with the relevant policies. We consider that this project complies with the relevant national policies and will contribute to the local economy. As a result, we totally support the CDM application of Jiangyou Longfeng Hydropower Station.
