Agreement to purchase Natural Gas – GSPA
Gas sale Purchase Agreement

EcoTraders

- Agreement between the natural gas consumer and the natural gas supplier
- While the transporting contract is a standard contract subordinate to the natural gas authority approval, the GSPA is the fruit of a negotiation directly with the natural gas supplier.
- The agreement is for a limited time- mostly long term (between 5 to 15 years)
- The agreement is for the supply of a limited quantity and includes a commitment to T.O.P (Take Or Pay).
- The supplier point of supply is in the entrance to the transporting system (Ashdod or Ashkelon), the consumer has to transmit the gas to its facilities

I have read the translation and it corresponds to the original.
