Sir,

Sub: Proposed Water Supply Arrangement for Ankit Metal & Power Ltd, at Jorehira, Block Chhatra, Dist. Bankura - Scheme prepared by PHE Department, Govt. of West Bengal.

Ref: Your Memo No. PHE/251/S dated 30.01.2006.

We are thankful to you for the Detailed Scheme Report on Water Supply Arrangement for our Integrated Steel Plant at Jorehira, Block Chhatra, Dist. Bankura. We are grateful to you for the support and help given to us in the interest of the industrial development of the backward district of Bankura. In this connection, we refer to our discussion on the scheme-proposal. As augmentation of Sectors Water supply Scheme will take long time to implement and we are in urgent need of water to operate and run our plant at Jorehira, we have decided to adopt the Water Supply Arrangement prepared by your department by sinking riverbed horizontal tube wells on the Derakeswar river bed (Proposal - I).

In view of the above and as discussed, we want to execute the Water Supply Arrangement Scheme prepared by your office from our end with the help and guidance from the PHE Department. You are requested to kindly convey your clearance so that we can immediately start the execution of the scheme from our end since this time of the year is most suitable for sinking tube wells at the river bed to tap the sub-surface flow of the river Derakeswar.

Your prompt clearance to commence the work will be highly appreciated in the interest of the industrial development of the backward district of Bankura.

Thanking you,

Yours faithfully,
 For Ankit Metal & Power Ltd
