Reply to Request for Review:CDMP00002520
Angang Waste Gas Recovery and Generation Project

- 1. Further clarification is required on how the DOE has validated the suitability of:
(a) power & resource expenditure, in particular, “BFG and mixed gas processing costs” as the baseline scenario represents flaring of these waste gases;**
- 2. The PP/DOE shall explain the calculation of the income tax. It is not clear why the income tax applies starting from the first year.**
- 3. The DOE is requested to further substantiate the means of calculation of f_{cap} in accordance with ACM0012, version 2, in particular, estimation of f_{cap} based on the maximum quantity of waste gas generated in the 3 years previous to the start of the project activity.**

Joint response by TÜV SÜD and Project Participant

PP decided to withdraw the project at this stage and submitted a withdrawal letter to TÜV SÜD (see Annex 1). The withdrawal letter will be uploaded in the context of this response.
