Subject: RE: REVISED: Request for review RESPONSES incomplete: Request for issuance 7726 Kainji Hydropower Rehabilitation Project, Nigeria

Dear Mr. D'Angelo,

Thank you for your message.

Please be informed that it is not possible to enter a negative value on the interface. In order to finalize your submission, please enter "1" and inform us so we can make the necessary adjustment on the submission page.

Kind regards,
CDM Team

Subject: RE: REVISED: Request for review RESPONSES incomplete: Request for issuance 7726 Kainji Hydropower Rehabilitation Project, Nigeria

Dear CDM Team,

Following your kind reminder and with reference to your notification in subject, this is a kind request of support about the following.

The revised report which we are going to upload contains a negative opinion thus the "*Certified amount of GHG emission reductions or GHG removals for this monitoring period*" is negative. Unfortunately in the project web page the field "*Total verified and certified emission reductions or removals by sinks during the period from 1 January 2013 onwards (tonnes of CO2 equivalent)*" does not allow to enter a negative value. Could you please suggest us the way to correctly upload the revised documentation we have prepared? Should we enter "zero" and then upload the certification (verification) report where the negative value is reported?

Thanking in advance for your support, we remain available for any clarification you may need.

Kind regards,
RINA Team

Dear DOE representative,

As a gentler reminder, we have not received your responses to the request for review for the request for issuance of 7726 Kainji Hydropower Rehabilitation Project, Nigeria covering the period of 01 January 2013 to 31 December 2017.

Please submit your responses through the CDM workflow. Once submitted, please let us know by responding to this message.

Kind regards,
Your CDM Team
UNFCCC

- Request for review RESPONSES incomplete: request for issuance of 7726 Kainji Hydropower Rehabilitation Project, Nigeria

=====

Dear DOE representative,

Please be informed that responses submitted for the request for review for the request for issuance of 7726 Kainji Hydropower Rehabilitation Project, Nigeria covering the period of 01 January 2013 to 31 December 2017 are incomplete for the following reasons:

As per PCP-PA, Version 2.0, paragraph 228, for each issue (or sub-issue) raised in the request for review, the project participants, and the DOE, shall either:

(a) Respond by making any revisions that they deem necessary to the monitoring report and attached spreadsheets, verification report, and/or certification report, and where there is a change to the number of CERs requested, by also submitting a new “CDM project activity issuance request form” (CDM-ISS-FORM), to ensure, inter alia, that all facts are clearly stated and sufficiently verified; or

(b) Respond in writing by addressing why no revisions to the monitoring report, verification report, and/or certification report are necessary.

However, it is observed that DOE has not submitted its opinion as per para 228(a) or 228(b) of the PCP-PA, version 2.0.

These responses are therefore rejected. Please submit revised documentation addressing the points above by logging into your CDM account and uploading directly to the record for this project.

Yours sincerely,

CDM team
