5th Periodic Verification of
**Xiaogushan Hydropower Project
in People's Republic of China**

CDM Reference No. 0378

Report No. GR11W0003D
25 August, 2011

JACO CDM

CERTIFICATION STATEMENT

JACO CDM has performed a verification of the CDM project "Xiaogushan Hydropower Project in People's Republic of China". The verification is based on the currently valid documentation of the UN Framework Convention on Climate Change (UNFCCC). In this context, the relevant documents are the "Marrakech Accords".

The management of Xiaogushan Hydropower Company Limited is responsible for the preparation of the GHG emission data and the reported GHG emissions reductions of the "Xiaogushan Hydropower Project in People's Republic of China" on the basis set out within the project Monitoring and Verification Plan indicated in the registered PDD version 2 dated 10 February 2006 and the 3rd revised monitoring plan which is complying with the consolidated methodology ACM0002 and approved on 17 August, 2010 by the CDM EB. The development and maintenance of records and reporting procedures in accordance with that plan, including the calculation and determination of GHG emission reductions from the project is the responsibility of the management of the project.

The verifier assesses that the project is operated as planned and described in the validated and registered PDD. Installed equipment being essential for generating emission reduction runs reliably and is calibrated appropriately. The monitoring system is in place and the project is generating GHG emission reductions.

The verifier assesses that the monitoring was done in accordance the monitoring plan and the GHG emission reduction in the Monitoring Report version 1.1 is calculated without material misstatements.

Our opinion relates to the project's GHG emissions and resulting GHG emissions reductions reported and related to the valid and registered project baseline and monitoring, and its associated documents. Based on the information we have seen and evaluated, we will confirm the following statement:

Reporting period: From 01-01-2010 to 31-12-2010

Verified emission in the above reporting period:

Baseline emissions:	372,460 tCO ₂ equivalents
Project emissions:	0 tCO ₂ equivalents
Emission reductions:	372,460 tCO ₂ equivalents

Hence, JACO CDM requests the CDM Executive Board to issue CERs equal to the verified amount — 372,460 tCO₂ equivalents — of reduction of anthropogenic emissions by sources of greenhouse gasses.

Date: 25 August, 2011

Yasunori SHIMOI
CEO, President of JACO CDM
