

Periodic Certification Statement

Bureau Veritas Certification has performed the 1st periodic verification of the first crediting period for Bentong Biomass Energy Plant in Malaysia UNFCCC Ref no.: 0501, which applies the methodology AMS I.C version 8 and category AMS III.E version 8. The verification was performed based on the requirements set by the CDM and relevant guidance provided by CMP and the CDM Executive Board.

The verification consisted of the following three phases: i) desk review of the project design and the baseline and monitoring plan; ii) follow-up interviews with project stakeholders; iii) resolution of outstanding issues and the issuance of the final verification report and opinion.

The management of Enco Danstoker (Malaysia) Sdn. Bhd responsible for the preparation of the GHG emissions data and the reported GHG emissions reductions of the project on the basis set out within the project Monitoring and Verification Plan indicated in the approved PDD. The development and maintenance of records and reporting procedures in accordance with that plan, including the calculation and determination of GHG emission reductions from the project, is the responsibility of the management of the project.

Bureau Veritas Certification verified the Project Monitoring Report version 04 for the reporting period as indicated below. Bureau Veritas Certification confirms that the project is implemented and described in validated and registered project design documents. Installed equipment being essential for generating emission reduction runs reliably and associated instruments used for monitoring are calibrated appropriately. The monitoring system is in place and the project is already generating GHG emission reductions.

Bureau Veritas Certification can confirm that the GHG emission reduction is calculated without material misstatements. Our opinion relates to the project's GHG emissions and resulting GHG emissions reductions reported and related to the valid and registered project baseline and monitoring, and its associated documents.

Based on the information we have seen and evaluated, we confirm the following statement:

Reporting period: From 01/01/2008 to 30/06/2009

Baseline emissions : 135,402 tCO₂ equivalents.

Project emissions : 3,385 tCO₂ equivalents.

Emission Reductions : 132,016 tCO₂ equivalents
