

Certification Report

Jinan Landfill Gas to Energy Project

(CDM Registration No. 0933)

5th Verification Monitoring Period: 01/03/2010 - 31/01/2011

10 May 2011

Japan Consulting Institute

Report No. JCI-CDM-CER-10/029-5P

Revision No. 00

1. Certification Statement

JCI conducted the 5st periodic verification for Jinan Landfill Gas to Energy Project (CDM Registration Reference No.933). The outline of the project is as follows.

- Project title; Jinan Landfill Gas to Energy Project
- Reference Number; 933
- Registration Date; 13 May, 2007
- Crediting Period; 13 May 2007 to 12 May 2014
- Host Country; People's Republic of China

The actual amount of achieved GHG emission reductions by the project activity was verified through the assessment of monitored data and relevant calculations provided by the project participant.

The verification is based on:

- Registered PDD Version 05 dated 31/07/2009
- Approved small scale methodology AMS-I.D. "Grid connected renewable electricity generation" version 9
- Approved consolidated baseline methodology ACM0001 "Consolidated methodology for landfill gas project activities" version 4
- Monitoring Report Version 02 dated 22/03/2011
- Clean Development Mechanism Validation and Verification Manual version 01.2

The GHG emission reductions were calculated correctly and appropriately on the basis of the approved baseline and monitoring methodologies AMS-I.D. and ACM0001, the monitoring plan and formulae stipulated in the registered PDD.

Based on the assessment results of the project activity as detailed in the verification report, JCI, herewith, certifies the following:

Verified period: 01/03/2010 - 31/01/2011

Verified Emission Reductions: 78,317 ton CO₂e

Date: 10 May 2011

Akio Yoshida
