Certification Report

Quimobasicos S.A de C.V.

Periodic Verification of the Registered CDM Project
“Quimobásicos HFC Recovery and Decomposition Project”

UNFCCC 0151-CDMP

Monitoring period 15: 30th September to 30th December 2008

Report No. 1276533

21 January 2010

TÜV SÜD Industrie Service GmbH
Carbon Management Service
Westendstrasse 199 - 80686 Munich - GERMANY

1 CERTIFICATION STATEMENT

TÜV SÜD Industrie Service GmbH has performed the Fifteenth periodic verification of the CDM project: "Quimobásicos HFC and Decomposition Project". The verification is based on the currently valid documentation of the UN Framework Convention on Climate Change (UNFCCC). The management of Quimobásicos S.A de C.V is responsible for the preparation of the GHG emissions data and the reported GHG emission reductions on the basis set out within the project's Monitoring Plan indicated in the registered PDD version 04, dated 23-05-2006 and the applied methodology AM0001/ Version03. The request for revising monitoring plan is required due to the wastewater treatment plant at the Quimobásicos plant is in operation, removing fluoride as a solid using calcium hydroxide. The result is a sludge that has to be removed and transported to a landfill outside of the city of Monterrey, Mexico. In order to assess this parameter, the audit team needs to check the number of trucks leaving the project site for transportation the sludge. This parameter was not included in the revised monitoring plan, therefore a revision is requested, Date of approval 27-11-2009.

The verifier can confirm that:

- the development and maintenance of records and reporting procedures are in accordance with the registered monitoring plan;
- the project is operated as planned and described in the project design document approved by the EB;
- the installed equipment being essential for generating emission reduction runs reliably and is calibrated appropriately;
- the monitoring system is in place and generates GHG emission reductions data;
- the GHG emission reductions are calculated without material misstatements;
- the monitoring plan in Monitoring Report is as per the PDD and monitoring plan approved by the EB;
- the monitoring plan in the approved PDD is as per the applied methodology

Our opinion is based on the project's GHG emissions and resulting GHG emission reductions reported, which have been both determined through the valid and registered project's baseline, its monitoring plan and its associated documents.

Based on the information we have seen and evaluated, we confirm the following statement:

Reporting period: 30-09-2008 to 30-12-2008

Verified emissions in the above reporting period:

Baseline emissions: **683,658** t CO_{2e}

Project emissions: **54** t CO_{2e}

Leakage emission: **100** t CO_{2e}

Emission reductions: **683,504** t CO_{2e}
