

**Annex 48****Issuance****Scope of the review on  
“Quimobásicos HFC Recovery and Decomposition Project” (0151)**

1. The Board agreed to undertake a review of the project activity “Quimobásicos HFC Recovery and Decomposition Project” (0151).
2. The Board agreed that the scope of the review shall cover an assessment to determine:
  - (a) How the DOE verified that the monitoring plan was in accordance with the requirements from the monitoring methodology regarding how the calibration of the monitoring instruments was conducted (i.e. all of the measurement instruments are to be recalibrated monthly per internationally accepted procedures, except for the HFC-23 flow-meter).
  - (b) How the DOE verified that the monitoring of leaked HFC-23 when the thermal oxidizer stops was in accordance with the requirements from the methodology (i.e. when the thermal oxidizer stops, analysis of the effluent gas is done to check leaked HFC 23 by sampling) and the reasons for not adopting a conservative approach or submit a request for deviation, as per VVM version 01.1 paragraph 207 (a), and for not requesting a revision of the monitoring plan, as per VVM version 01.1 paragraph 215.
  - (c) The potential to inflate the baseline of HCFC22 CDM project activities and thereby generate emission reductions that are in excess of what would have been issued in accordance with CDM rules and requirements.
