# Workplan of panels and working groups for 2014 (mid-year review)

Version 02.0

**United Nations**  
Framework Convention on  
Climate Change

## **COVER NOTE**

### **1. Procedural background**

1. The Executive Board of the clean development mechanism (hereinafter referred to as the Board) at its seventy-seventh meeting adopted the 2014 workplan of the Accreditation Panel, the Methodologies Panel, the Small-Scale Working Group, the Afforestation and Reforestation Working Group and the Carbon Dioxide Capture and Storage Working Group, as contained in annex 2 to the report of the aforesaid meeting.

### **2. Purpose**

2. The purpose of this document is to report on the implementation of the planned work of the panels and working groups.

### **3. Key issues and proposed solutions**

3. Changes to the approved version of the workplan are highlighted and the rationale for changes is also provided in the document in the status/comments column.

### **4. Impacts**

4. Mid-year progress review on the workplan of panels and working groups helps to ensure efficiency and transparency of the decision-making process and will facilitate the Board's management of its workload when planning work for 2015.

### **5. Subsequent work and timelines**

5. As per the approved CDM Executive Board workplan 2014, the secretariat provides mid-year progress review and status report on the implementation at the end of the year on workplan of panels and working groups.

### **6. Recommendations to the Board**

6. The secretariat recommends that the Board take note of the mid-year progress review on the workplan of panels and working groups and provide comments, as it deems appropriate.

## **1. Introduction**

1. The support structure of the Executive Board of the clean development mechanism (hereinafter referred to as the Board), consisting of the Accreditation Panel (CDM-AP), the Methodologies Panel (MP), the Small-Scale Working Group (SSC WG), the Afforestation and Reforestation Working Group (A/R WG) and the Carbon Dioxide Capture and Storage Working Group (CCS WG), is established under the Board to assist in the performance of its functions related to the accreditation system (through the CDM-AP) and methodological issues concerning clean development mechanism (CDM) project activities (through the MP, SSC WG, A/R WG and CCS WG). The mandates of the panels and working groups are determined by their terms of reference, the rules of procedure of the Board, and additional guidance provided by the Board.
2. The workplan of the panels and working groups includes the routine operation activities to be performed by them as well as new activities related to the objectives of the CDM Management Plan 2014.
3. This mid-year progress report aims to provide transparent information to the Board and the public about the work undertaken by these bodies against the approved plans early in the year.

## 2. Routine operations for methodology-related panels and working groups in 2014 (MP, SSC WG, A/R WG, CCS WG)
