

关于中原燃机电厂 CDM 项目补充材料的证明函

致相关单位:

位于华中电网内的湖南金竹山亚临界燃煤电厂(2X600MW)和华能沁北超临界燃煤电厂(2X600MW)均承担了重要的电网调峰功能。其调峰输出可以达到天然气电厂的调峰功能。

中原燃气电厂和郑州燃气电厂是河南省范围内仅有的两家燃气上网发电的电厂,中原燃气电厂位于河南省驻马店市周湾工业园,郑州燃气电厂位于河南省郑州市高新工业园。中原燃气电厂是华中电力调度通信中心直调电厂,2008年实际发电量为1665910MWh(调度报表数据)。

特此证明!

Translation of the content:

We confirm that Jinzhushan project and Qinbei project, which located in Central China Power Grid, have all provided important peak load electricity services. The output of providing peak load electricity could reach the output of natural gas power station.

Currently, there are only two grid-connected natural gas power plants of this type in Henan Province: the Henan Zhongyuan Gas Power Plant and Zhengzhou Natural Gas power Plant and Henan Zhengzhou. The annual power generation of Zhumadian project is 1,665,910 MWh in 2008.
