

CERTIFICATION REPORT

**EMPRESA DE ACUEDUCTO Y ALCANTARILLADO DE BOGOTA (EAAB)
(COLOMBIA)**

**Initial Verification and Verification of the first Monitoring
Period**

Of the

SANTA ANA HYDROELECTRIC PLANT
(UNFCCC REGISTRATION REF. N°: 0275)

**REPORT NO. 002-2007 CDM
VER-0004**

July 5th 2007

ICONTEC
Carrera 37 52-95, Bogotá, Colombia

CERTIFICATION STATEMENT

ICONTEC has performed a verification of the CDM project of Santa Ana Hydroelectric Plant in Bogotá, Colombia, for the period from 2005 08 01 to 2006 07 31. This verification approach was based on the requirements as defined under the Kyoto Protocol, Marrakech accord, as well as those defined by the CDM Executive Board.

The management of the Santa Ana Hydroelectric Plant is responsible for the preparation of the GHG emissions data and reporting of GHG emissions reductions on the basis set out within the project's Monitoring and Verification Plan (2005). The development and maintenance of records and reporting procedures in accordance with that plan, are responsibility of the management of Santa Ana Hydroelectric Plant.

ICONTEC conducted the verification having considered the Project Design Document including Monitoring Report and Verification Plan for the Project of Santa Ana Hydroelectric Plant and the applied baseline as registered for the project. This assessment included:

- collection of evidence supporting the reported data
- checking whether the provisions of the Monitoring and Verification Plan, were consistently and appropriately applied
- Verification that the information included in the Monitoring report is updated and has been correctly implemented and that the emissions reduction achieved has been determined by correctly subtracting emissions for the accreditation period.

ICONTEC can confirm that EAAB Project Developer's GHG emissions for Santa Ana Hydroelectric Plant in Bogotá for the period from 2005 08 01 to 2006 07 31 as reported in REP NO. 002-2007 CDM VER-0004 Verification Report, prepared on the basis of Santa Ana Hydroelectric Plant Project Monitoring Report and Verification Plan, are fairly stated.

The GHG emission reductions were calculated correctly on the basis of the Project Design Document and the EAAB Project's Monitoring report.

Based on the information that ICONTEC has seen and evaluated, it is our opinion that 23960 ton / CO₂ eq have been abated by the project during the period 2005 08 01 to 2006 07 31.

Reporting period: From 2005 08 01 to 2006 07 31

Verified emission in the above reporting period:

Emission reductions: 23960 t CO₂ equivalents

Bogotá D.C., July 5th 2007
