Betreff: Re: AW: Finding during completeness check PA 2714 Assisted Natural Regeneration of Degraded Lands in Albania

Dear DOE representative,

With reference to the Request for issuance for project "Assisted Natural Regeneration of Degraded Lands in Albania"(2714) we wish to kindly inform you that no revised PDD is necessary. However, Please note that the following documents are to be submitted:

1. A new signed form referring to a PRC.
2. A dully completed "Post-registration changes request form" (F-CDM-PRC)
3. An Assessment opinion/Verification report on the changes by the DOE prepared in accordance with the "Clean development mechanism validation and verification standard".

In accordance with the CDM Project Cycle Procedure Version 03.2 para 62, please submit the additional documents by email before 21 April 2013 17:00 CEST.

Thank you and best regards,

Your CDM team
UNFCCC secretariat

AW: Finding during completeness check PA 2714 Assisted Natural
Regeneration of Degraded Lands in Albania

Dear Mr. Abaeeyan,
Dear CDM Secretariat,

Unfortunately, we received below e-mail "Finding during completeness check PA 2714 Assisted Natural Regeneration of Degraded Lands in Albania" from you, yesterday.

As per our understanding of the standards and how it was handled in the past, no revised PDD and separate PRC Validation Report was necessary up to now for A/R project activities under VVM and VVS considering the development and existence of "Guidelines on accounting of specified types of changes in A/R CDM project activities from the description in registered project design documents" EB 66 A24. This understanding was also among DOEs after receipt of a clarification response letter from 2012-12-20 written by Mr. Andrew Howard (Secretary of CDM Executive Board) where it says that PRCs for A/R projects shall be handled during RfI within the MR and Verification Report, only (thus without revised PDD) (letter attached).

Since the existence of the PRC, TN has verified three A/R project activities and it was common understanding, that no new PDD is required.

All these projects passed the completeness checks without problem even though the same types of PRC were existent.

We have further information that recently another CDM A/R project (Project: 4957 SECURITIZATION AND CARBON SINKS PROJECT), verified by another DOE, passed the completeness check under the VVS without submitting a new PDD, even though the PRCs were similar to this project.

As rules seems to be not clear and different advices are given to different DOEs (which implies unfair market conditions with high differences in workload and costs for PPs and DOEs), we kindly ask you to clarify if a revised PDD is really necessary or if at least the deadline could be extended to submit revised documentation.

With kind regards
Alexandra Nebel

Betreff: Finding during completeness check PA 2714 Assisted Natural Regeneration of Degraded Lands in Albania

Dear DOE representative,

With reference to the Request for Issuance for project "Assisted Natural Regeneration of Degraded Lands in Albania" (2714), kindly note the following issue to be raised during the completeness check stage:

While conducting the completeness check, it has come to our attention that the request for issuance contains post registration changes specific to afforestation or reforestation projects (item 7 of Appendix 1 to the Project Standard). As the submission was made under the VVS track, any changes to the registered project activity must follow the post registration change request as per the CDM Project Cycle Procedure section 6. Since the changes fall under Appendix 1 to the Project Standard, the CDM Project Cycle Procedure paragraphs 135, 139 and 187 apply.

Based on the above, kindly submit by replying to this email following additional documents required as per PCP paragraph 139 (a), (b), (c) and (e):

- (a) A fully completed "Post-registration changes request form" (F-CDM-PRC);
- (b) An assessment opinion on the changes by the DOE prepared in accordance with the "Clean development mechanism validation and verification standard";
- (c) Revised PDD, (in both clean and track-change versions);
- (e) Supplemental documentation, as appropriate.

In accordance with the CDM Project Cycle Procedure version 02.0 para 62, please submit the revised document before 13 May 2013 17:00 CEST.

For future submission of request for issuance with any changes to the registered project activity, kindly follow section 6 of the CDM Project Cycle Procedure.

Thank you and best regards,

Your CDM team
UNFCCC secretariat
