CERTIFICATION REPORT

EMPRESA DE ACUEDUCTO Y ALCANTARILLADO DE BOGOTÁ (EAAB)
(COLOMBIA)

**VERIFICATION OF THE SECOND MONITORING PERIOD
OF SANTA ANA HYDROELECTRIC PLANT**
(UNFCCC REGISTRATION REF. N°: 0275)

VERIFICATION PERIOD:
2006-08-01 TO 2007-07-31

REPORT N°. CDM VER-003
ver 04

ICONTEC
Carrera 37 52-95
Bogotá, Colombia

July 23rd, 2008

VERIFICATION STATEMENT

ICONTEC has performed a verification of the CDM project to examine the greenhouse gas (GHG) emission reductions reported from the Santa Ana Hydroelectric plant for the corresponding crediting period, equating to 23 881 tons of CO₂ equivalent.

We consider that the project's GHG emissions and resulting GHG emissions reductions reported in the Monitoring Report version 02 of 2008 04 15 are fairly stated.

The Management of the Santa Ana Hydroelectric Plant is responsible for the preparation of the GHG emissions data and the reported GHG emissions reductions on the basis set out within the project's Monitoring and Verification Plan.

The Management of Santa Ana Hydroelectric plant is responsible for developing and keeping records and reporting procedures in accordance with the Monitoring plan.

ICONTEC is responsible to set an independent GHG verification opinion on the GHG emissions from the project and approved baseline for the same period.

In a planned way ICONTEC got the information and asked for explanations we deemed necessary to provide enough evidence that the amount of GHG emission and the calculation of the GHG emission reductions, based on the Monitoring Report, are fairly stated for the reporting period.

Our verification approach was based on the Kyoto Protocol requirements, Marrakech Agreement, as well as those defined by the CDM Executive Board.

ICONTEC approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions data and the controls in place to mitigate them. Our examination includes assessment, on a test basis, of evidence relevant to the amounts and disclosures in relation to the project's GHG emission and the calculations of GHG emission reductions for this reporting period.

ICONTEC is able to certify that the emission reduction from the Santa Ana Hydroelectric Plant during the period from August 1st, 2006 to July 31st, 2007 equals to 23 881 tons of CO₂ equivalent.
