

**CDM: Form for submission of queries from DOEs to the Methodologies Panel regarding the application of approved methodologies (version 01.1)**

*(To be used by DOEs for presenting questions / proposals / amendments related to the applicability of approved methodology)*

<b>Name of the entity (DOE) submitting this form</b>	Bureau Veritas Certification Holding SAS
<b>Reference number and title of the approved methodologies</b>	ACM0002/Version13.0.0 "Consolidated baseline methodology for grid-connected electricity generation from renewable sources"
<b>Title/Subject (give a short title or specify the subject of your submission, maximum 200 characters):</b>	Clarification on the applicability of ACM0002 Version 13.0.0 to a hydropower project activity.
<b>Attach CDM-PDD example of project activity where applicability raises problem:</b>	<input type="checkbox"/> Yes, is attached.
<b>Date and signature for the DOE</b>	

**Submitted queries**

Please use the space below to substantiate the queries relating to the application of approved methodologies. If the questions are related to a project activity under development or implementation, please describe the context in which they arose. If you are proposing amendments to existing methodologies, please specify the text you want to change or introduce. If necessary, attach files or refer to sources of relevant information.

**If you have a question relating to the application of an approved methodology, please specify and provide reference to the exact project activity to which it applies.**

>>

The clarification is regarding the applicability of approved methodology ACM0002 version 13 to a hydropower project activity.

The underlying project activity is to re-construct a hydro power plant at a site where the previous one had been destroyed by flood in July 2004. The project activity includes re-construction of tailrace tunnel, switchyard, most of supporting facility and installation of new turbines, generators, transformers and monitoring system. The power generation capacity of the new plant would be 368 MW comparing to the previous one i.e. 360MW.

This request is seeking for the clarification on whether this project activity could be considered as an installation of a new power plant at a site where no renewable power plant was operated prior to the implementation of the project activity (greenfield plant) and if the baseline emissions calculation could follow option (a) Greenfield renewable energy power plants.

**If you propose an amendment to an approved methodology, please provide reasons.**

>>

N/A

**In case you propose the amendment to the approved methodologies, please provide your draft below, if not included in an annex:**

>>

N/A

Date of submission of contribution:	15/03/2013
<b>Information to be completed by the secretariat</b>	
Date when the form was received at UNFCCC secretariat	
Date of transmission to the Meth Panel and Executive Board
