

 <p align="center">CDM: Form for submission of queries from DOEs to the Methodologies Panel regarding the application of approved methodologies (version 01) <i>(To be used by DOEs for presenting questions / proposals / amendments related to the applicability of approved methodology)</i></p>	
Name of the entity (DOE) submitting this form	Det Norske Veritas Certification Ltd.
Reference number and title of the approved methodologies	AM0014
Title/Subject (give a short title or specify the subject of your submission, maximum 200 characters):	Applicability of AM0014 to combined cycle natural gas power plants
Attach CDM-PDD example of project activity where applicability raises problem:	<input type="checkbox"/> Yes, is attached.
Date and signature for the DOE	14 November 2005 <i>Michael Lehmann</i>
Submitted queries Please use the space below to substantiate the queries relating to the application of approved methodologies. If the questions are related to a project activity under development or implementation, please describe the context in which they arose. If you are proposing amendments to existing methodologies, please specify the text you want to change or introduce. If necessary, attach files or refer to sources of relevant information.	
If you have a question relating to the application of an approved methodology, please specify and provide reference to the exact project activity to which it applies. >>AM0014 in its current form only applies to “natural gas-based <u>cogeneration</u> projects”. The Meth Panel is requested to consider whether AM0014 can also be applied by projects comprising a combined cycle natural gas power plant, given that the project meets the applicability criteria of AM0014. An example of a combined cycle natural gas power plant project that applies AM0014 is the “20 MW Natural Gas based combined cycle package cogeneration power plant at Mayiladuthurai Taluk, Nagapattinam District, Tamil Nadu - India” (the PDD of this project is published on http://www.dnv.com/certification/climatechange/Projects/ProjectDetails.asp?ProjectId=262). This project only supplies electricity to designated consuming facilities, but does not supply any heat. This project can thus not be considered a cogeneration project, although it otherwise meets the applicability criteria of AM0014.	
If you propose an amendment to an approved methodology, please provide reasons. >>.	
In case you propose the amendment to the approved methodologies, please provide your draft below, if not included in an annex: >>	
Date of submission of contribution:	14 November 2005

Information to be completed by the secretariat	
Date when the form was received at UNFCCC secretariat	
Date of transmission to the Meth Panel and Executive Board
