Dear Members of the SSC-WG,

This request for clarification focuses on the monitoring of the electricity generation EG_y . In version 13, the monitoring frequency was not specified. In clarification SSC_164, it was explained that ACM0002 was a relevant reference. The wording of ACM0002 of that time (version 9) was as follows:

“Hourly measurement and monthly recording.”

With regard to this, the clarification SSC_164 specified that:

“The hourly recording is only applicable for those plants that are under hourly load dispatch mode.”

Later AMS-I.D v14 started specifying the monitoring frequency:

“Hourly measurement and monthly recording are required.”

Today AMS-I.D v16 uses this wording:

“Continuous monitoring, hourly measurement and at least monthly recording.”

A clarification is sought to confirm that with this wording, the hourly measurement is only applicable for the plants under hourly dispatch mode, as stated in SSC_164.
