

 <p align="center"><b>CDM: Form for Submissions on Small Scale Methodologies and Procedures (version 03)</b>  <i>(To be used for presenting questions/proposals/amendments related to the simplified methodologies for small-scale CDM project activity categories)</i></p>	
<b>Name:</b>	Daniel E. White, George T. Maher, Fernando Villasana Institution: <u>Investment Technology Resources, Inc.</u>
<b>Affiliation<sup>1</sup>:</b>	<input type="checkbox"/> DNA <input type="checkbox"/> DOE <input checked="" type="checkbox"/> PP <input type="checkbox"/> Stakeholder
<b>Title/Subject (max. 200 characters):</b>	Request for AMS-II.C. revisions to address project activities involving installation of water saving devices
<b>Purpose of the submission:</b>	<input type="checkbox"/> Query on an approved SSC methodology or small scale procedures <sup>2</sup> (Fill in field 1. below) <input checked="" type="checkbox"/> Request for Revision of an approved SSC methodology (Fill in fields 2. and 3. below) <input type="checkbox"/> Proposal for a new SSC methodology (Fill in fields 4. and 5. below)
<b>Approved SSC methodologies<sup>2</sup> to which your submission relates to, if applicable.</b>	AMS-II.C./Version 13 - Demand-side energy efficiency activities for specific technologies
<b>Contact Information (e-mail addresses to which the answers are to be delivered and phone contacts for possible dialogue on the submission).</b>	<u>DanWhite@itr-inc.org</u> , +1-202-306-2730, Skype: danielwdc <u>GeorgeTMaher@itr-inc.org</u> , +1-281-830-8144, Skype: jorge_de_texas <u>f.villasana@southpolecarbon.com</u> , +52 (55) 5564 6793, Skype: fernando_villasana
<b>Information for completing the form</b>	
Describe the questions related to the SSC Methodologies, Modalities and Procedures below. If the questions are related to a project under development or implementation, you may describe the context in which they arose.	
<b>Query on an approved SSC methodology or SSC procedures</b>	
1. If you have questions relating to the application of an approved small-scale methodology (AMS) please specify and provide reference to the exact technology/measure below. If you have questions related to procedures for SSC project activities please clarify below:	
<b>Request for revision of an approved SSC methodology</b>	
2. If you are proposing an amendment/revision to an approved small-scale methodology (AMS), please provide justifications below:	

<sup>1</sup> Designated National Authority (DNA); Designated Operational Entity (DOE); Project Participant (PP), and Stakeholder.

<sup>2</sup> The list of all approved small-scale methodologies (AMS) can be found at <http://cdm.unfccc.int> and go to CDM: small scale CDM methodologies.

We are proposing these revisions in light of the guidance provided by the SSC WG in its January 14 Final Response in SCC\_500, the SSC WG's October 22, 2010, Final Response in SCC\_473, and the Board's November 22, 2010, guidance at EB 58, para. 53).

The EB requested the SSC WG to consider water saving devices under paragraph 2 in light of the efficiency and level of service attributes of such devices. In SCC\_500, the SSC WG found that a number of changes are required for AMS-II.C. in order for the methodology to properly accommodate the project activity technology.

We have not restated here the various discussions within those prior records. We would be pleased to do so if you deem it appropriate so the full record is in one docket.

Our intent with the proposed revisions is to follow the guidance as to the changes suggested as appropriate for AMS-II.C. so as to properly accommodate the project activity of supplying and installing water saving devices. We particularly focused on the clarifications and modifications identified by the SSC WG in SCC\_500.

Additionally, our revisions implement the SSC WG's Final Response in SCC\_401 in which the SSC WG mentioned making language and numbering clarifications when the methodology is next revised. Also, a number of variable definitions were moved consistent with the statement in SCC\_401 that variables are defined when they first appear and standard practice is not to repeat definitions.

We recognize that there are several ways one could structure the text and equation revisions in the methodology to achieve the purposes. For example, the matter of accounting for water heater efficiency could be addressed in separate equations in the baseline and project emission sections.

The substantive aspects of our changes include the following:

- Concerning Technology/measure –
  - 1) Paragraph 2 additions to clarify that for water saving devices
    - a) 'water output' restrictions do not apply and
    - b) 'level of service' concerns comfort and cleaning performance.
- Concerning Baseline –
  - 1) Paragraph 5 additions to
    - a) provide a formula accommodating fossil fuel similar to that for electricity in Paragraph 6,
    - b) account for water heating fossil fuel energy consumption, and
    - c) clarify (methodology wide) that 'power' can mean or reference thermal energy.
  - 2) Paragraph 6 additions to account for
    - a) water heating electricity consumption
    - b) water heater efficiency, and
    - c) changes related to implementing the SSC\_401 clarification of project activity hours.
  - 3) Paragraph 7 additions to address free ridership concerns.
- Concerning Project Activity Emissions –
  - 1) Paragraph 8 additions to account for
    - a) water heating electricity consumption,
    - b) water heater efficiency, and
    - c) changes related to implementing the SSC\_401 issue of project activity hours.
- Concerning Monitoring –
  - 1) Paragraph 14 additions to account for
    - a) removal or manipulation of devices by consumers and
    - b) monitoring of devices for projects that do not involve direct installation.

3. If you are proposing an amendment/revision to an approved small-scale methodology (AMS) please provide the draft methodology with changes highlighted.	
<p>The following documents have been attached to this form:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Draft methodology with changes highlighted in Word and PDF formats</li> <li><input type="checkbox"/> PDD in PDF format (optional)</li> <li><input type="checkbox"/> Additional information (please specify if you are providing any information note, published paper or a report in support of the request for revision of the SSC methodology)</li> </ul>	
<b>Proposal for a new SSC methodology</b>	
4. If you are proposing a new small scale methodology, please provide justifications below:	
5. For submitting a new small scale methodology a filled in form "CDM: form for proposed new small scale methodologies (F-CDM-SSC-NM)" is required.	
<p>The following documents have been attached to this form:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Completely filled in form "CDM: form for proposed new small scale methodologies (F-CDM-SSC-NM)" in Word and PDF formats<sup>3</sup></li> <li><input type="checkbox"/> A draft PDD (with sections A to C completed): <ul style="list-style-type: none"> <li><input type="radio"/> Relevant annexes to the PDD are provided</li> <li><input type="checkbox"/> Additional information (please specify if you are providing any information note, published paper or a report in support of the new SSC methodology)</li> </ul> </li> </ul>	
Date you are delivering the contribution:	14 February 2011, 21:00 GMT
<b>Information to be completed by the secretariat</b>	
SSC-Submission number	

<sup>3</sup> The current version of the form (F-CDM-SSC-NM) is available on the UNFCCC CDM website (<http://cdm.unfccc.int>).
