188. Bulgaria has reported its commitment period reserve as 378,963,955 t CO₂ eq in its NIR of its 2010 annual submission. This was found by the ERT to be incorrect as it was based on the 2007 inventory contained in the 2009 annual submission and not on the 2010 annual submission. Prior to the review week, Bulgaria submitted a revised calculation of the commitment period reserve of 371,589.05 Gg CO₂ eq based on the 2008 inventory contained in the 2010 annual submission (74,317.81 Gg CO₂ eq).

* In the symbol for this document, 2010 refers to the year in which the inventory was submitted, and not to the year of publication.
