

 CDM: Response form for Request for revision of approved methodologies (version 01.1)	
<i>Date of Meth Panel meeting:</i>	9 - 13 August 2010
<i>Title and number of Request for revision</i>	Expansion of ACM0006 to include a new scenario AM_REV_0196
Summary of the query: Please use the space below to summarize the request for revision on the related approved methodologies.	
<p>ACM0006 “Consolidated methodology for electricity generation from biomass residues” is applicable to electricity generation project activities (cogeneration or not) using biomass residues, including greenfield power plants, power capacity expansion projects, energy efficiency improvement projects and fuel switch projects. The request for revision seeks to expand the applicability of ACM0006 by including a new scenario to the methodology as follows:</p> <p>The project activity involves the installation of a new biomass residue cogeneration plant at a site where prior to the implementation of the project activity an existing fossil fuel cogeneration plant operated. The project plant could include new installations and part of the equipment of the existing plant. After the implementation of the project activity the existing fossil fuel cogeneration plant could not continue to operate and is retired due to the installation of the new plant.</p> <p>The power generated by the project plant substitutes power that would be produced in the grid. In case of cogeneration plants, the heat generated by the project plant would in the absence of the project activity be generated in third party heating systems. The biomass residues would in the absence of the project activity be dumped or left to decay or burnt in an uncontrolled manner without utilizing it for energy purposes.</p>	
Recommendation by the Meth Panel:	
(a) Please use the space below to provide amendments /changes (in your expert view, if necessary). Please, refer to the box below.	
(b) Please use the space below for providing guidance, as per Para 93 of EB25 Report, on what type of projects need to revise the PDD as a consequence of the suggested revision, if the recommendation is to revise the methodology. Please, refer to the box below.	

Answer to authors of the request for revision by the Meth Panel :

Please use the space below to provide an answer to the authors of the above query

The Meth Panel recommends [to approve](#) the request for revision. The proposed new scenario is covered by the revised version of ACM0006 "Consolidated methodology for electricity and heat generation from biomass residues" developed as part of the de-consolidation of the previous version of ACM0006.

Signed by the Chair, Mr. Lex de Jonge

Date: 13/08/2010
