

**Approved baseline and monitoring methodology/  
methodological tool revision recommendation form  
(Version 02.0)**

**INFORMATION TO BE COMPLETED BY PANEL/ WG**

<b>Date and number of Panel/ WG meeting:</b>	MP87 (7-11 February 2022)
<b>Title/Subject of the request for revision:</b>	Broadening the applicability of the approved methodology AM0009 to including recovery and utilization of gas from gas condensate fields that would otherwise be flared or vented, as well
<b>Reference number of the request for revision:</b>	AM_REV_0260
<b>Exact reference (number, title and version) of the methodology or methodological tool to which the request for revision applies:</b>	AM0009: Recovery and utilization of gas from oil fields that would otherwise be flared or vented --- Version 7.0
<b>Summary of the request for revision:</b>	
<b><u>Original text from PP:</u></b> Please see request <a href="#">here</a> .	
<b>Recommended decision to the Board on the request for revision</b>	
<input type="checkbox"/> Approve the proposed revised methodology or methodological tool ("A case") <input checked="" type="checkbox"/> Reject the proposed revised methodology or methodological tool ("C case")	
<b>Type of the revision if the recommendation is A case</b>	
<input type="checkbox"/> The revision is a major revision <input type="checkbox"/> The revision is a minor revision	
<b>Reasons for rejection if the recommendation is C case</b>	
<p>It should be noted that the production of natural gas and condensate often occurs simultaneously, with natural gas typically being the main product. In view of this, the Methodologies Panel (Meth Panel) is of the view that the proposed expansion of scope needs to clarify the procedure to ensure that the project activity takes place at a field originally developed to extract condensate as the main product and the aim of the project activity is to recover the associated gas which would have been flared in the absence of the project activity. The underlying PDD has included a description which corresponds to a natural gas field, which is not eligible under the methodology which is applicable only to oil fields.</p> <p>In addition, the request for revision has not addressed the concerns raised via AM_CLA_0294 and AM_REV_248, which have provided specific guidance should a revision be proposed.</p>	
<b>Any other issues arising from the request for revision</b>	
n/a.
